Precision Furnace or Boiler Tune-Up & Carbon Monoxide Safety Check \$69 Fundraiser Special

What do you get for your \$69?

You get peace of mind that your heating and cooling systems are safe, reliable, and operating at maximum efficiency. The package includes:

- Camera inspection of the furnace and heat exchanger
- Carbon monoxide test
- Adjust and test system efficiency
- Test safety controls
- Clean and oil the blower
- Remove dirt, soot, or corrosion

Keep your family safe from Carbon Monoxide

The Center for Disease Control recommends tune-ups and safety checks annually. One in five heating systems have a safety issue that could cause carbon monoxide poisoning. Carbon monoxide is a colorless, odorless gas and it causes more than 20,000 emergency room visits annually.

A tune-up and safety check will ensure your home's heating and cooling systems are operating safely, efficiently, and reliably all winter long.

Simple maintenance can save you money!

- If you haven't had your furnace or A/C tuned up in the last 3 years, you could be consuming 5-10% more energy than needed.
- Prevent costly repairs – avoid your system failing while you're not home.
- Extend the life of your system.
